HEADTOTOE 2021
THE LEADER IN SUSTAINABLE
APPAREL AND HEADWEAR

We continue to lead the way in producing fabric made from recycled plastic bottles!

A majority of the corporations in the USA have sustainability programs in place! Our products exceed green and sustainable corporate policies. We have an unmatched story that can be supplied for your next presentation, showing how many plastic bottles can be prevented from ending up in the world's oceans and landfills. We have already removed tens of millions of bottles to date, and with your partnership, we can remove millions more!

What does RPET stand for? **Recycled Poly Ethylene Terephthalate**, also known as **Recycled polyester**.
The end product is a recycled apparel piece. *Bottle usage based on 500ML or 19.9 oz bottles.*

Why recycled polyester vs. other sustainable fabrics?

1. Of the synthetic fibers, RPET polyester has an almost 90% lower carbon footprint than nylon.
2. RPET polyester fabric has a 75% lower carbon footprint than virgin polyester.
3. RPET polyester fabric has a 50% lower carbon footprint than organic cotton.

Save Earth. Go Green.
